

## Deckard Software Release: 1.1.0

**Description:** Version Description Document for Deckard SW version 1.1.0

**System:** Vulcan

**Release Date:** 9 February 2022

### Version Description

**Previous Version Number:** 1.0.0

**New Version Number:** 1.1.0

**MD5 Hash:** a80c7c8db63b55f4ea2b808760fea5cb

**Compatibility:** Kraken, Beast, and Beast Plus operating with the Vulcan software system.

### New Features

This release of the Deckard data analytic tool greatly expands Deckard capabilities from only DMR and adds the capacity to ingest and process P25, NXDN, Tetra, TPMS, and analog data and DF logs. This update also includes a complete redesign of the filter panel to greatly improve user experience.

### Improvements

The following issues/bugs were resolved for this release of Diablo:

- Added P25, NXDN, Tetra, TPMS, and analog data and DF analytics
- Each protocol now has its own set of filters that are independent of other protocol filters
- Mapping DMR: added capabilities to track transmission types (DM1, DM2) more efficiently
- Mapping LOB Lines have been standardized to match the analyze tab
- Added MGRS
- Numerous bug fixes and improvements

**WARNING: Export Control**

This document may contain technical data within the definition of the International Traffic in Arms Regulations (ITAR), and subject to the Export Control Laws of the U.S. Government. Transfer of such data by any means to a foreign person, whether in the United States or abroad, without proper export authorization or other approval from the U.S. Department of State is prohibited.
